1 [It is my understanding that the Sacred Yucca Mountain, Sacred to the Shoshone and other tribes for the herbs that are gathered and for the heritage of the stories of this place, is about to be used as a toilet for the dumping of nuclear wastes generated all over this country.

Please, consider the people that are being impacted by this, and how much of their way of life is being stolen from them or turned into garbage by uninformed projects that contaminate the area and destroy what is sacred.]

2 [Further, the geological information available says that it is not safe as there are fault lines that need to be considered for impact on the entire region should a major quake happen in that area, and which is likely to happen in that area, if not in our lifetime, the lifetime of our children and your children.]

1  
cont [Surely you can find some less sacred place to dump this most dangerous of by products and leave the Shoshone and the other tribes this small space to continue a way of life that was here long before you or I had set foot on this earth.

I for one, am tired of seeing Indian People and their lands treated like they hold no value. The value in this place is what you are missing in your life if you don't understand it.]

Please reconsider. This will not go unnoticed.

Sincerely,

Cat West
